

OBJECT LESSON TO ARCHITECTS

Secretary Metcalf Tells the
Cabinet of the San Francisco Disaster.

Washington, May 8.—Secretary Metcalf returned to Washington today from San Francisco.

Secretary Metcalf explained to the president and cabinet that the reports of the devastation wrought by the earthquake and fire were not exaggerated, and that the work of relief necessary must continue for some time. He praised the army for its efficiency, and said that Dr. Devine, representing the Red Cross, and the citizens relief committee, had done and were doing everything possible. He was emphatic in his commendation of E. H. Harriman of the Southern Pacific, who, he said, in addition to affording the facilities of his road, had given largely of his personal funds and assisted otherwise in the work of relief.

Steel Structures Best.

In discussing the situation today with a representative of the Associated Press, Secretary Metcalf said that the destruction of San Francisco and the other California cities and towns furnished the best object lesson to architects and builders in this country and in the world. It was proved conclusively on deposit that steel structures had best withstood the shocks and fire, and that granite under intense heat was practically worthless.

Another point which, he said, impressed him considerably was the fact that the situation disclosed a less proportion of poor persons in San Francisco than generally had been supposed. It was found that there was on deposit on the day of the calamity in savings banks over \$165,000,000, or an average of \$200 per capita for every citizen of the city.

WILL ASK ROOSEVELT TO END THE STRIKE

Chicago, May 8.—The "peace" convention of the bituminous coal operators will open here tomorrow morning. It is known that negotiations with the United Mine Workers looking toward a settlement of the strike are at an end. A telegram was received from John Mitchell today rejecting the last arbitration proposal of the mine owners. The operators in their last proposal offered to arbitrate not only the miners' demand for increased wages, but also the "open shop" system. That is the day of employers and the fixing of differentials between pick and machine mining.

Plans are being made by the operators to send a delegation to Washington to ask President Roosevelt to take immediate action to end the strike in the bituminous fields. According to present plans, fifty or more coal operators representing the bituminous district of Missouri, Kansas, Arkansas, Indian Territory, Illinois, Indiana and Ohio, will call on the president.

ANTI-TRUST LAW WEAK.

Opinion Expressed by Former Comptroller of the Currency.

Cincinnati, May 8.—Charles G. Dawes, former comptroller of the currency, in a speech before the Bankers' club tonight, declared that the Sherman anti-trust law is a dead letter, and a discouraging influence to business. "This is the day of trade agreements," he said, "and the Sherman anti-trust law, by its inherent quality, nullifies its power and is a hindrance to good. A trade agreement may or may not be in restraint of trade. I hold that there are some which are not. The public and the present law is weak in that it lacks the specific definition of what is a legal restraint of trade."

In the carrying on of business, the business man is prevented from entering into agreements with competitors which are essential.

NOTICE.

The public is warned against purchasing a check for \$17.50, drawn on Charles Peterson's bank of Richmond by R. H. Thompson, payable to R. McKenzie. Indorsed by R. McKenzie, Harry Bailey and Sarah Mansfield, as the check was stolen.

MORGAN'S BILL SHELVED BY SENATE COMMITTEE

Washington, May 8.—Senator Morgan's bill providing for a sea level canal for the isthmus, except through Culebra, where he proposes locks, was shelved on the table today by the senate committee on interoceanic canals. Mr. Morgan gave notice that he would accept the verdict of the committee, but would urge the senate to take up the bill. The action of the committee is in accord with its decision not to consider a bill determining the type of canal, but to permit the president to proceed to the construction of a lock canal under the Spooner act.

MAY SNOWSTORM.

Plainfield, Wis., May 8.—A furious may snowstorm prevailed over Wisconsin last night and today. Eight inches of snow fell.

MOTHER AND CHILD.

Let the mother take Scott's Emulsion for the two; it never fails to benefit them both. One can eat for two, but nourishing two is a different thing. It calls for a degree of internal strength that the average woman lacks. People of luxury are not very strong by habit; overworked people are weak in some functions from exhaustion or their surroundings. Scott's Emulsion can be depended upon to overcome such conditions. It is a wonderful food for a mother and child.

MOCK TRIAL OF ELKS.

Have Much Amusement Over Alleged Theft of Box of Cigars.

Hilarity was the keynote of a mock trial held by the local Elks in their sanctuary last evening. All officers from the exalted ruler down to the chief keeper of the goat's wardrobe, were charged with feloniously, wilfully and selfishly stealing a box of cigars from the club's sideboard.

John Corlew, attorney for the plaintiff, and H. E. Dwyer as attorney for the defendant, made a fine show of legal argument on the grounds that the property was burned by the defendants and went up in smoke. The Elks, however, were firm in their denial and escaped punishment.

The board of county commissioners has

asked the city for a portion of the room in the basement of the court house, now occupied by the Provo free public library. The county and city own the court house jointly, the city's portion being only one-sixth, and as there is not enough room for all the offices there is more or less trouble in regulating the space to which each of the offices is entitled. If the county can convince the city that it is entitled to more room than it has the library will probably have to be moved, or arrangements made by the city for renting an office for the surveyor outside of the court house. The council committee on public grounds and city property is wrestling with the subject.

Peterman's Roach Food

A BOON TO HOUSEKEEPERS.

The most improved method to free a house of large or small roaches is to use the contents of a box of "Peterman's Roach Food" at one time. Shake it on joints so small it will penetrate and remain to keep the premises continuously free. Roaches eat it as food; it is the most destructive remedy on this earth to them, and it will not scatter them to other places to live and multiply.

BEDBUGS—"Peterman's Discovery"

(Quicksilver)—Bedbugs take it up in the circulation when going over where it is brushed on lightly. It's invaluable if brushed on beds when apart, and back of picture frames, moldings, etc. It will not rust or harm furniture or bedding. Odorless, and not poisonous.

"Peterman's Discovery" (liquid)—In flammable, handy cans for cracks, walls, mattresses, etc. Odorless, non-explosive.

"Peterman's Ant Food"—A strong powder to kill and drive away ants.

"Peterman's Rat-mouse Food" makes rats or mice wild; they will leave and not return.

Take no other; as time may be even more important than money.

TERRIBLE LIQUOR CRAVING

How Orrine Destroys All Desire for Whisky or Beer—Guaranteed by Your Druggist.

The terrible craving for liquor is a symptom of disease, and to overcome it the disease itself should be treated in a scientific way. If the nerve cells are properly treated the craving for liquor will be destroyed.

It is in this way that Orrine cures alcoholism by supplying to the nerve cells the strength needed, thus destroying the desire for liquor. It eradicates every particle of the terrible liquor craving, imparts new strength and vigor to the whole system and restores the general health. Treatise on how to cure drunkenness free on request. Orrine Co., Washington, D. C.

So successful has Orrine been that in every box is a registered guarantee which entitles you to a refund of your money if Orrine fails to effect a cure.
